**Keeping Us Engaged** Christine Harrington, FO 50 College Students, 2023-07-03 This book offers faculty practical strategies to engage students that are research-grounded and endorsed by students themselves. Through student stories, a signature feature of this book, readers will discover why professor actions result in changed attitudes, stronger connections to others and the course material, and increased learning. Structured to cover the key moments and opportunities to increase student engagement, Christine Harrington covers the all-important first day of class where first impressions can determine students' attitudes for the duration of the course, through to insights for rethinking assignments and enlivening teaching strategies, to ways of providing feedback that build students' confidence and spur them to greater immersion in their studies, providing the underlying rationale for the strategies she presents. The student narratives not only validate these practices, offering their perspectives as learners, but constitute a trove of ideas and practices that readers will be inspired to adapt for their particular needs. Conscious of the changing demographics of today's undergraduate and graduate students - racially more diverse, older, and many employed - Harrington highlights the need to engage all students and shares numerous strategies on how to do so. While many of the ideas presented were used by faculty teaching face to face classes, a number were developed by faculty teaching online, and the majority can be adapted to virtually any teaching environment. Based on student-centered active learning principles, structured to allow readers to quickly identify practices that they may need in particular instances or to infuse in a course as a whole, and presented without jargon, this book is a springboard for all faculty looking for ideas that will engage their students at any level and in any course.

*Student Work and Teacher Practices in Science* Christine Y. O'Sullivan, Andrew R. Weiss, 1999 In 1996, the National Assessment of Educational Progress (NAEP) assessed the knowledge and skills of students in the areas of earth science, life science, and physical science. It also collected information related to the background of students (grades 4, 8, and 12), their teachers (grades 4 and 8), and the schools they attended (grades 4, 8, and 12). This report is intended primarily for science teachers; hence, the results presented relate directly to student performance, classroom practices, and school climate. This report also discusses students' attitudes and beliefs about science. The report is divided into four parts. In the first part

(chapter 1), an overview of the assessment is provided. This includes information about the framework used in the development of the assessment, a description of how the assessment was administered to students, and an explanation of how to interpret NAEP results. In the second part (chapters 2, 3, and 4), examples of questions and student responses are presented. These chapters are divided by grade. The third part (chapters 5 and 6) contains information collected from students, teachers, and school administrators about classroom practices, student motivation, and parental involvement in learning. Finally, the fourth part contains appendices offering a fuller description of the procedures used for the NAEP 1996 science assessment (appendix A), scoring guides for questions discussed in chapters 2, 3, and 4 (appendix B), and standard errors for the statistics presented in the report (appendix C). *Ensuring Learning* Christine Harrington, 2020-08-15 *Ensuring Learning: Supporting Faculty to Improve Student Success* is the second book in a two-book series. This book highlights the importance of teaching and learning in student success reform and is a deep dive into the fourth pillar, ensuring learning, of Guided Pathways which is a national movement focused on increasing the number of college students who earn a degree or credential. It emphasizes how institutional strategies such as investing in faculty development through Centers for Teaching and Learning and revising reward structures can significantly improve student achievement and completion rates. This book calls for colleges to prioritize teaching and learning and provides college leaders with guidance on how to do so. For example, strategies to develop and enhance Centers for Teaching and Learning and increase professional development programming that provides ongoing, substantial support to faculty are shared. Readers will benefit from numerous practical suggestions on how to help faculty improve teaching and learning practices and ultimately improve student success outcomes.

*I Can Make This Promise* Christine Day, 2019-10-01 In her debut middle grade novel—inspired by her family’s history—Christine Day tells the story of a girl who uncovers her family’s secrets—and finds her own Native American identity. All her life, Edie has known that her mom was adopted by a white couple. So, no matter how curious she might be about her Native American heritage, Edie is sure her family doesn’t have any answers. Until the day when she and her friends discover a box hidden in the attic—a box full of letters signed “Love, Edith,” and photos of a woman who looks just like her. Suddenly, Edie has a flurry of new questions about this woman who shares her name. Could she belong to the Native family that Edie never knew about? But if her mom and dad have kept this secret from her all her life, how can she trust them to tell her the truth now?

**Math Sense** Christine Moynihan, 2012 How is that you can walk into a classroom and gain an overall sense of the quality of math instruction taking place there? What contributes to getting that sense? In *Math Sense*, author Christine Moynihan explores some of the components that comprise the look, sound, and feel of effective teaching and learning. Does the landscape of the classroom feature such items as student work samples, a math literature collection, and a number line? Do

the lessons include wait time, checks for understanding, and written feedback? Do you feel a spirit of collaboration, risk taking, and a sense of pride? In *Math Sense*, Moynihan provides a series of self-assessment rubrics to help you identify the earmarks of a vibrant mathematics community that will help inform and refine your practice. This practical guide offers a road map for taking stock of your teaching and building a stronger mathematics classroom environment for you and your students.

*Transformative Ethnic Studies in Schools* Christine E. Sleeter, Miguel Zavala, 2020 Drawing on Christine Sleeter's review of research on the academic and social impact of ethnic studies commissioned by the National Education Association, this book will examine the value and forms of teaching and researching ethnic studies. The book employs a diverse conceptual framework, including critical pedagogy, anti-racism, Afrocentrism, Indigeneity, youth participatory action research, and critical multicultural education. The book provides cases of classroom teachers to 'illustrate what such conceptual framework look like when enacted in the classroom, as well as tensions that spring from them within school bureaucracies driven by neoliberalism.' Sleeter and Zavala will also outline ways to conduct research for 'investigating both learning and broader impacts of ethnic research used for liberatory ends'--

**A Foreign Kingdom** Christine Talbot, 2013-12-30 The years from 1852 to 1890 marked a controversial period in Mormonism, when the church's official embrace of polygamy put it at odds with wider American culture. In this study, Christine Talbot explores the controversial era, discussing how plural marriage generated decades of cultural and political conflict over competing definitions of legitimate marriage, family structure, and American identity. In particular, Talbot examines the Mormon question with attention to how it constructed ideas about American citizenship around the presumed separation of the public and private spheres. Contrary to the prevailing notion of man as political actor, woman as domestic keeper, and religious conscience as entirely private, Mormons enfranchised women and framed religious practice as a political act. The way Mormonism undermined the public/private divide led white, middle-class Americans to respond by attacking not just Mormon sexual and marital norms but also Mormons' very fitness as American citizens. Poised at the intersection of the history of the American West, Mormonism, and nineteenth-century culture and politics, this carefully researched exploration considers the ways in which Mormons and anti-Mormons both questioned and constructed ideas of the national body politic, citizenship, gender, the family, and American culture at large.

*Exploring Character* R. E. Myers, 2006 Educational resource for teachers, parents and kids!

Midcourse Correction for the College Classroom Carol A. Hurney, Christine M. Renner, Jordan D. Troisi, 2023-07-03 This book is about using the Small Group Instructional Diagnosis (SGID) method to make improvements to the educational experience midcourse. The idea is to use this structured interview process to involve students in helping faculty improve a course while they are in it, potentially making a difference for themselves as well as for future students. Faculty gain the

opportunity to work on a course before it ends, and can see what changes work without waiting for the next time the course is offered, or the end of semester student evaluations. SGID is a consultation method developed to collect midsemester feedback from students using structured small and large group conversations, involving four conversations between students, a learned colleague the authors refer to as the SGID consultant, and the instructor. First, student talk with each other in small groups about the learning happening in a course, under the guidance of a consultant (SGID Conversation #1- Student & Students). Then the SGID consultant engages the students in a conversation about how the feedback provided impacts the learning in the course (SGID Conversation #2 - Students & Consultant). Then there is a conversation between the consultant and the instructor, where they discuss how the feedback provided by the students can best inform the pedagogical approaches and strategies used by the instructor (SGID Conversation #3 - Consultant & Instructor). Finally, the instructor closes the feedback loop with a conversation with their students about what they learned and how best to move forward (SGID Conversation #4 - Instructor & Students). These conversations during the middle of the semester change the way students think about the teaching and learning endeavor, the way instructors perceive the learning challenges of their courses, and the quality of the institutional academic culture. Most importantly, the SGID equips the instructor with the knowledge to make midsemester course corrections that can profoundly impact the ways students navigate the course, communicate with the instructor, and realize the ways effective teaching can enhance learning.

*Learning Through Serving* Christine M. Cress,Peter J. Collier,Vicki L. Reitenauer,2023-07-03 This substantially expanded new edition of this widely-used and acclaimed text maintains the objectives and tenets of the first. It is designed to help students understand and reflect on their community service experiences both as individuals and as citizens of communities in need of their compassionate expertise. It is designed to assist faculty in facilitating student development of compassionate expertise through the context of service in applying disciplinary knowledge to community issues and challenges. In sum, the book is about how to make academic sense of civic service in preparing for roles as future citizen leaders. Each chapter has been developed to be read and reviewed, in sequence, over the term of a service-learning course. Students in a semester course might read just one chapter each week, while those in a quarter-term course might need to read one to two chapters per week. The chapters are intentionally short, averaging 8 to 14 pages, so they do not interfere with other course content reading. This edition presents four new chapters on Mentoring, Leadership, Becoming a Change Agent, and Short-Term Immersive and Global Service-Learning experiences. The authors have also revised the original chapters to more fully address issues of social justice, privilege/power, diversity, intercultural communication, and technology; have added more

disciplinary examples; incorporated additional academic content for understanding service-learning issues (e.g., attribution theory); and cover issues related to students with disabilities, and international students. This text is a student-friendly, self-directed guide to service-learning that: Develops the skills needed to succeed Clearly links service-learning to the learning goals of the course Combines self-study and peer-study workbook formats with activities that can be incorporated in class, to give teachers maximum flexibility in structuring their service-learning courses Promotes independent and collaborative learning Equally suitable for courses of a few weeks' or a few months' duration Shows students how to assess progress and communicate end-results Written for students participating in service learning as a class, but also suitable for students working individually on a project. Instructor's Manual This Instructor Manual discusses the following six key areas for aligning your course with use of Learning through Serving, whether you teach a senior-level high school class, freshman studies course, or a college capstone class: 1. Course and syllabus design 2. Community-partner collaboration 3. Creating class community 4. Strategic teaching techniques 5. Developing intercultural competence 6. Impact assessment
